The Salter Tree and Herb Farm received a research and development grant from the Florida Wildflower Foundation and Florida Wildflower Advisory Council for a native perennial wildflower, *Phlox pilosa* or downy phlox. As part of the grant to develop this wildflower's availability, the STHF will offer this plant for distribution to growers, researchers, collectors and gardeners. Orders can be placed for plants and seeds on a limited basis for fall 2006, with inventory expected to be available as production increases through to Spring 2007 and after. Reserve orders for plants for fall pick-up or seeds to be mailed can be placed now. Additional information available upon request. Research and development grant report will be available at the end of September 2006. Please pass this information to any interested persons.  
Thank you. ~Joanna Booth 850-574-8367
